Hi Robert, Christie and EPA press team-

Will the administrator be visiting the mine site?

We'd like to position a photographer there if so. Please let me know.

Also, will be following up shortly with add'l questions for today's story, which is going to focus on long-term prospects for contamination to be re-mobilized during high waters and also exploring potential (or not) for removing contamination from river system.

Thanks much-

Matt Brown
